ISSP 2018 – Religion IV
Study Monitoring Questionnaire

***INTERNATIONAL
SOCIAL
SURVEY
PROGRAMME***

Study Monitoring Questionnaire

PLEASE COMPLETE THIS QUESTIONNAIRE FOR THE

ISSP 2018 RELIGION IV STUDY

RETURN TO: Smith-Tom@NORC.org

Details of Your Institute

1a. Please enter the name of your institute and your country:

Institute:

The Applied Social
Sciences Forum « ASSF »

Country:

Tunisia

1b. Please enter the name of the principal investigator and your contact person for questions about the study:

Principal
Investigator:

Pr.Abdelwahab Ben
Hafaiedh

Contact
Person:

a.benhafaiedh@assforum.org

2a. What kind of institute fielded the module?

An institute principally doing market research ☐

An institute principally doing academic research ☒

An institute doing both market and academic research ☐

Other (please write in details) ☐

2b. Which institute carried out the fielding?

Name:

ASSF

Questionnaire Languages

3a. Was the questionnaire fielded ...

only in English ☐ → Question 12

in English plus other language(s) ☐ → Question 3b

only in translation ☒ → Question 3b

3b. Please enter the language(s) the module was fielded in.

Please write in: English language To Arabic language

Translation

Note: If your translation process was different for different languages, please answer questions 4 to 10 for your most common practice and note any differences for other languages in question 11.

4. Was the questionnaire ...?

a written translation (a questionnaire/application) ☒ → Question 5

an oral translation (interviewer translated on the spot) ☐ → Question 11

5. Who carried out translation? Please tick all that apply.

A member or members of the research team ☒

A translation bureau ☐

One or more specially trained translators ☐

Other (please write in details) ☐

6. Was translation checked?

Yes, all of the questionnaire ☒ → Question 7

Yes, only the new questions ☐ → Question 7

No ☐ → Question 8

7. How was translation checked?

Group discussion ☐

Expert checked it ☐

Back translation ☐

Other (please write in details) ☒

Please write in: A university English Professor Aida Saidani
Email contact: aida_saidani@yahoo.fr

8. Was the translation questionnaire pre-tested?

Yes ☒

No ☐

9. Were there any questions, sections, words or concepts which caused problems when translating? Please tick all that apply.

No problems ☐ →Question 11

Answer scales ☐

Instructions ☐

Whole questions ☐

Words or concepts ☒

Other (please write in details) ☐

Please write in details of problems checked/ticked above:

10. What did you do about any problems in translation?

We did not notice a major problem during the translation

11. If your translation process was different for different languages, please note any differences for other languages in the box below.

Please enter details:

Fielding the ISSP Module

12. How was the ISSP Religion module fielded in your country?

As an individual survey, the ISSP Religion module was the whole survey) ☒ →Question 15

As part of a larger survey ☐ →Question 13

13. Please provide information about the other stud(ies) the ISSP was fielded with (e.g., topic, survey name).

Please enter:

14. What was the approximate position of the module in the larger questionnaire?

Start of questionnaire ☐

Middle of questionnaire ☐

End of questionnaire ☐

15. Were the substantive questions in the module all asked in the prescribed order?

Yes ☒ → Question 17

Yes, apart from omissions ☐ → Question 17

No ☐ → Question 16

16. Why was the question order changed?

Please enter:

17. Were all the core ISSP questions included in your questionnaire (by core we mean all required substantive and background questions)?

Yes – all questions and background questions included ☒ → Question 19

No – substantive question(s) from module missing ☐ → Question 18

No – required background ISSP question(s) missing ☐ → Question 18

18. Please provide details of the questions missing and indicate why they are missing.

Source questionnaire: question number or description of question:

Only the Optional Items was not added to the questionnaire

Reason(s) why missing:

Sampling

19. Was your sample designed to be representative of ...

Only adult citizens of your country? ☒

Adults of any nationality residing in your country? ☐

20. Was your sample designed to be representative of ...

Only adults living in private accommodation? ☒ → Question 21

Adults living in private and in institutional accommodation
(e.g., residential homes for the elderly, asylum accommodation)? ☐

If private and institutional, please enter details in box below.

Please enter in:

21. What was the lower age cut-off for your sample?

WRITE IN :

22. Was there any upper age cut-off for your sample?

Yes - please write in cut-off

No cut-off ☒

23. Were any groups excluded or under-represented in your sample design,
apart from the age cut-offs or citizenship requirements just asked about?

No ☒

Yes (please write in details)

If yes, write in details:

24. Did you use any variables for stratification?

Yes ☒ → Question 25

No ☐ → Question 26

25. Please describe the stratification variables used?

Please write in: Governorate / Age group/ Occupation/ Gender/

26. How many of stages did your sampling design have?

One stage ☐

Two stages ☒

Three stages ☐

Four stages ☐

27. Did your sampling frame consist of...?

Addresses ☐

Households ☐

Named individuals (the target persons) ☐

Named individuals (not the target persons) ☐

Areas ☒

Something else (please write in details) ☐

28. Please describe your sampling frame (e.g., population register, electoral roll, telephone directory and its coverage and updating).

Please write in:

The sampling frame is the general census of population and housing (2014)

The Sampling model is stratified three-stage probability sampling : Districts , households, persons.

The survey methodology is a multi-stage territorial stratified selection (multistage probabilistic sampling)

29a. Please describe your sampling method and your sampled units for the first stage?

First level : Clusters selection

The National Institute of Statistics (NIS) divides each governorate into districts. This method has been adapted and standardized for all statistical studies. A table of representative proportions of households in 24 governorates and urban and rural regions has been provided by the NIS.

29b. Please describe your sampling method and your sampled units for the second stage?
(Only if you have two or more stages, otherwise continue with question 30.)

Second level: Household Selection

The random selection of households follows a mapping of the blocks belonging to the selected cluster; mapping is performed to determine a systematic random walk or a systematic interval calculated based on the estimated number of households in each block.

In each map, the starting point and systematic random walk is selected in each block by the regional supervisor.

We will map the blocks to give an estimate of the number of households that will be covered, following “random Walk.” For example, if the block contains 30 households (knowing that we will select 10 households in each block ($30/10 = 3$)), the first household is randomly selected from 1 to 10, for instance, saying that the first selected household is number 3, the second household will be number 6 and so on.

In case the household owner refuses to conduct the survey, the surveyor moves to the second household automatically.

In case the individual who is randomly selected is not present in the household, the interviewer should make at maximum three callbacks before replacing it with another household. In total, we have three visits before removing the household from the sample.

29c. Please describe your sampling method and your sampled units for the third stage?
(Only if you have three or more stages, otherwise continue with question 30.)

Respondent selection

Only one person per household will be interviewed.

Throughout the method taken, if the household includes the target individual that meets the requirements of the quota sheet matrix, the interviewer completes their questionnaires. Households will be interviewed for the survey until a predetermined quota is reached.

29d. Please describe your sampling method and your sampled units for the fourth stage?
(Only if you have four stages, otherwise continue with question 30.)

Please write in:

30. What selection method was used to identify a respondent?

(Do not answer if your sampling frame consists of named individuals – which are the target persons. Continue with question 32.)

Kish grid ☐

Last (or next) birthday ☐

Quota ☒

Other (please write in details) ☐

31. Please describe your quota procedures.
(Only if you used quota, otherwise continue with question 32)

Please write in:

Attached the quota table used in ISSP Study based on three stratification variables (Occupation / Age / Gender / Governorate) based on 2014 Census

32. Was substitution or replacement permitted at any stage of your selection process or during fieldwork?

Yes ☒

→Question 33

No ☐

→Question 34

33. Please provide details of the substitution or replacement procedures used.

Please write in:

The substitution or replacement is used only in the case when the individual who is randomly selected is not present in the household, the interviewer should make at maximum three callbacks before replacing it with another household. In total, we have three visits before removing the household from the sample.

34. All in all, what are the known limitations (biases) of your net sample?
For example: is there differential coverage of particular groups, either because of sample design or response differences?

Please write in:

Data Collection

35. What data collection methods were used for the module (substantive and background questions)?

Face-to-face ☒

Self-completion (with some interviewer involvement in delivering or collecting) ☐

'Mixed mode': part self-completion, part face-to-face (please write in details) ☐

Other (please write in details) ☐

If 'mixed mode' or other, please write in:

The Data collection used was a face to face method in household and central location (Computer assisted personal interviewing CAPI)

36. Please write in the approximate start and end dates of fieldwork.

DD MM YY

Start date

0	5	0	1	1	9
---	---	---	---	---	---

End date

0	8	0	2	1	9
---	---	---	---	---	---

37. Were postal or telephone components used at any point (e.g., advance contacts)?

Yes - postal ☐ → Question 38

Yes - telephone ☐ → Question 38

No ☒ → Question 39

38. Please give details of the postal and/or telephone components.

Please enter details:

39. Were incentives offered?

Yes, to respondent ☐

Yes, to interviewer ☐

No, neither to respondent nor to interviewer ☒

Interviewer Procedures

40. Were interviewers paid according to realized cases?

Yes ☒

No ☐

41. Which, if any, of these rules governed how an interviewer approached an address/household?

Tick all that apply

Calls/visits must be made at different times of day ☒

Calls/visits must be made on different days of week ☐

Neither of the above ☐

42. Were interviewers required to make a certain number of calls/visits before they stopped approaching an address or household?

Minimum number of calls/visits required - please write in number

No minimum call requirement ☐

43. Were any interviews supervised (that is, supervisor accompanies interviewer)?

Yes - please write in approximate proportion %

No ☐

44. Were any interviews back-checked (e.g. supervisor checks later whether interview conducted)?

Yes - please write in approximate proportion %

No

Response and Outcome Information

45. Please fill in the following details about your issued sample.

Some categories may not apply, but please complete to the highest level of detail possible.

Issued sample (n)	Total number of starting or issued names/addresses (gross sample size)	1200
Ineligible (n)	Addresses which could not be traced at all/ selected respondents who could not be traced	
	Addresses established as empty, demolished or containing no private dwellings	
	Other ineligible (please specify)	
Eligible (n)	<i>Issued sample minus Ineligible</i>	
Refusal (n)	Personal refusal at selected address	
	Proxy refusal (on behalf of selected respondent)	
	Other refusal at selected address	
Non-contact (n)	No contact at selected address	
	No contact with selected person	
Other unproductive (n)	Selected respondent too sick / incapacitated to participate	
	Selected respondent had inadequate understanding of language of survey	
	Selected respondent away during survey period	
	Other type of unproductive reaction (please specify)	
Valid cases (n)	Full productive interview	1218
	Partial productive interview (50% of the module or more)	

More information on "Other ineligible":

Please write in:

Coding and Verifying

46. Were any measures of coding reliability employed?

Yes ☒

No ☐

47. Was keying of the data verified?

Yes - please write in approximate level of verification

1	0	0
---	---	---

 %

No ☐

48. Were any reliability checks made on derived variables (that is variables constructed on the basis of other variables collected)?

Yes ☒

No ☐

No derived variables ☐

49. Were data checked/edited to ensure that filter instructions were followed correctly?

Yes ☒

No ☐

50. Were data checked/edited for logic or consistency?

Yes ☐

No ☒

51. Were data checked/edited to ensure they fell within permitted ranges?

Yes ☐

No ☒

**If you answered YES for any question from Q46 to Q51, continue with Question 52.
If you answered NO for all questions Q46 to Q51, continue with Question 53.**

52. Were errors corrected?

Tick all that apply

Yes - individually ☐

Yes - automatically ☒

No - not corrected ☐

53. Were the data weighted or post-stratified?

Yes ☐ → Question 54

No ☒ → Question 55

54. Please briefly describe the weighting or post-stratification strategy used.

Please write in:

55. Is a national methods report available for your study?

Yes ☐

No ☒

56. If there is anything you would like to comment on, please do so here.

Please write in:

THANK YOU VERY MUCH
